### DETAILED ACTION

This Office action is in response to the amendment filed February 28, 2003.

1. The rejection under 35 U.S.C. 112, second paragraph is **withdrawn** in view of the amendment to claim 42.
2. The rejection under 35 U.S.C. 102(b) over HALEY et al is **withdrawn** in view of the amendment to claim 1 now reciting a strong acid instead of the counter ion derived from a non-volatile acid.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-2, 5, 7, 14, 18, 27, 28, 30, 32-35, 38, 40, 42, 43, 45 and 46 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,32-36, and 41-44 of U.S. Patent Application Publication No. 2033/0082474 A1

Although the conflicting claims are not identical, they are not patentably distinct from each other because the current application like the U.S. Patent Application Publication recite an acid curable composition and acid generator; and a strong acid and an infrared absorbing compound, see claims 1 and 32-36. Further the method the application and the publication recite a method of

Art Unit: 1752

producing an imaged element wherein the composition comprises an acid curable composition, an acid generator, a strong acid and an infrared absorber, see claims 42-44 in the U.S. Patent Application Publication.

The claims overlap in scope and a patent to both applications would provide a two rights to exclude for essentially the same invention.
